

Protect your valuable IT and AV equipment from just 59p per item.

Recommended and used by Police Forces worldwide, SelectaDNA is also available to buy in commercial kits, helping to protect schools, businesses, local authorities and hospitals across the UK.

Protect all your available assets including PC's, laptops, audio visual equipment and projectors by applying the unique formula, which only becomes visible under UV light. Tamper resistant stickers are supplied with each kit to warn criminals away from marked items and placing SelectaDNA signage around your premises, **is proven to reduce your chances of being a victim of theft and burglary by upto 85%.**

SelectaDNA irrefutably links criminals to crime scenes providing an unbreakable chain of evidence in a court of law, and improving the recovery of stolen assets.

Advances in DNA technology are helping police convict criminals daily, so the 'DNA fear factor' is keeping thieves well away from your valuables.

What is SELECTADNA™?

- ❖ SelectaDNA is easy to apply and when dry is virtually impossible to remove
- ❖ SelectaDNA is invisible to the naked eye, but glows under the UV search lights that are used by the Police
- ❖ As well as a unique DNA code, the SelectaDNA solution contains thousands of Microdots - each containing an owner code which is unique to that kit
- ❖ Police can quickly trace where an item was stolen from by calling the number displayed on the Microdot and checking the owner code against the secure LPCB Police approved database
- ❖ If no microdots are present, a sample of the solution can be forensically analysed to prove undoubted right of ownership.

Protect your premises instantly with SELECTADNA™

STEP 1

With a single brush stroke mark all your assets in a matter of minutes.

STEP 2

Apply warning stickers to assets and windows to warn thieves that your property is 'DNA protected'.

'Using SelectaDNA as a burglary reduction measure has had a real and lasting effect on our local community, reducing the fear of crime as well as actual levels of crime.'
